PROFILE

Software engineering student and freelance developer with 3+ years building production React and Next.js applications for paying clients. Certified AI Developer (Claude Code Partner Program), currently interning as an AI & Web Developer at Neopolis Development, a fintech and insurance-software company. Focused on putting LLM features into products people actually use.

EXPERIENCE

AI & Web Developer Intern · [Neopolis Development](#)

2026 – Present

Fintech & AssurTech · CRM/BPM, custom software and AI · Toulon, France / Tunisia

- Building AI-powered applications within the company's AI and custom-software practice, in a fintech and insurance-software environment.
- Working across the stack — React and Next.js front ends combined with LLM integration.

Freelance Web & AI Developer · Self-employed

2023 – Present

- Delivered 5+ client projects end to end — scoping, fixed-price quote, design, build, deployment and handover; repeat client base built entirely through referral.
- Specialise in performance-focused, responsive interfaces using React, Next.js, TypeScript and Tailwind CSS.
- Extended into AI work: assistants that answer from client content, document handling and repetitive-task automation, with inference cost kept in check.

SELECTED PROJECTS

Claims Triage Assistant · AI assistant

2025

Next.js · FastAPI · Python · Claude API

- Reads an incoming auto-insurance claim, works out the coverage, flags what is missing or suspicious, and drafts the reply for a human to approve.
- 20/20 correct triage across the evaluation suite, for under \$0.10 in inference cost.
- Human-in-the-loop by design — the assistant prepares the decision, a person makes it.

GreenHaven · E-commerce platform

2025

Next.js (App Router) · TypeScript · Tailwind CSS · Prisma ORM · Node.js · Vercel — github.com/yassinbehi/GreenHaven-onlineShop

- Full storefront: catalogue, server-rendered product pages for SEO, cart and checkout designed so a first-time visitor never has to think about where to click next.
- Type-safe codebase with Prisma handling schema, migrations and queries; mobile-first throughout and deployed to Vercel with a custom production configuration.

Medical Practice Management System · Desktop app

2024

Java · Swing · MySQL · JDBC · MVC

- Replaced a fully paper-based patient system for a local practice — records, scheduling and consultation history, with role-based access for doctors and secretaries.
- MVC architecture with MySQL persistence via JDBC; delivered from requirements gathering through to client handoff.

Business Showcase Websites

2023 – Present

React · Next.js · Tailwind CSS — landing pages and showcase sites for local businesses, tuned for Core Web Vitals and local SEO to drive organic traffic.

SKILLS

Core — JavaScript, TypeScript, React, Next.js (App Router, SSR, API Routes), Tailwind CSS

Backend & data — Node.js, Express, Python, Flask, FastAPI, Prisma ORM, SQL & database design, MySQL, REST APIs

AI — Claude API, LLM application development, prompt & context design, AI-assisted workflows

Tools — Git / GitHub, Figma, Vercel, Chart.js, Pandas

Also worked with — PHP, Java (Swing), C#, C

Practices — Responsive design, performance optimisation, SEO, component architecture

CERTIFICATION

Certified AI Developer — Claude Code Partner Program

EDUCATION

Software Engineering · IT Business School (ITBS), Tunisia

2023 – Present

Databases · Software engineering · Web development · Business intelligence
